DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Lawrence Eisen on March 7, 2006.

The application has been amended as follows:

- a. Claim 5, Line 5, following "emitting": Delete "the" and Insert -- a --
- b. Claim 5, Line 7, following "emitting": Delete "the" and Insert -- a --

Allowable Subject Matter

2. Claims 1-8 are allowed.
3. The following is an examiner's statement of reasons for allowance:

With regard to Independent Claims 1 and 5, the Applicant has sufficiently amended and defined an input device including a light guide (first and second light guides) with first and second light sources of distinct colors disposed at a side of the light guide (first and second light guides, respectively) thereof, a cap vertically movable on the light guide(s) and having first and second portions on the light guide (first and second light guides respectively), a control module selectively controlling the first and second light sources such that one is turned on and the other off, wherein, the control module controls the first light source to emit a first light of distinct color in a first direction

such that said first light is guided by the light guide (first light guide) to both the first and the second portions in a second direction, whereby the first portion displays more brightness than the second portion, and wherein, the control module controls the second light source to emit a second light of distinct color in a first direction such that said second light is guided by the light guide (second light guide) to both the first and the second portions in a second direction, whereby the second portion displays more brightness than the first portion, and lastly, wherein, the second direction is substantially perpendicular to the first direction. The prior art of record fails to teach or suggest the combination of structural elements claimed, and all subsequent dependent claims are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
